

Version 2026-09. For vendor and supplier onboarding. Company metrics and pricing bands are published at thinkscoopinc.com; registration and tax identifiers are supplied on supplier forms, not in this document.

ENTITY	FOUNDED	DELIVERY	START	OVERLAP
Thinkscoop Technologies LLP, Mohali, India	2017	Offshore or hybrid; no onsite US resources	First commit within 5 business days	4 hours daily with US Eastern

COMPANY

- Legal name: Thinkscoop Technologies LLP. Founded 2017. Headquarters: 40C, Aero Arcade, G-Block, Aerocity Near International Airport, Mohali, Punjab 140603, India.
- Website: thinkscoopinc.com. Commercial contact: Krishan Saini, Founder and CEO, krishan@thinkscoopinc.com, +91 7888558392, reachable 8 am to 12 pm ET.
- Team: a core engineering team in Mohali plus contracted specialists engaged directly by Thinkscoop under NDA. We do not supply onsite US resources and do not sponsor work authorization.
- Clients across the United States, Australia and the UAE. Engineering team in India. No physical offices outside India.

WHAT WE SUPPLY

Senior engineering capacity for the skills that are hardest to fill onshore. For any requisition we return named profiles within 48 hours and start within 5 business days.

Practice	Scope
Microsoft Dynamics 365 and Power Platform	Finance, Supply Chain, Sales, Customer Service; Power Apps, Power Automate, Dataverse, Copilot
Power BI and analytics	Semantic models, ETL and ELT, DAX, row-level security; Snowflake, BigQuery, Fabric, Databricks, SQL Server
Salesforce	Sales, Service and Experience Cloud; Apex, LWC, Flows; Einstein and Agentforce
SAP	S/4HANA, BTP, Integration Suite, Fiori
Production AI	LLM applications, RAG, tool-calling agents, evaluation, monitoring and guardrails; Claude, GPT-4o, Azure OpenAI, LangGraph
Full-stack, mobile, cloud, DevOps, QA	TypeScript, Node.js, Python, Go; React, Next.js, React Native, iOS and Android; AWS, GCP, Azure; Kubernetes, Terraform, CI/CD; test automation

COMMERCIAL (USD ONLY, PUBLISHED BANDS)

- Staff augmentation, hourly: \$25 to \$49 per hour for vetted mid-to-senior engineers embedded in your team; you direct the work.
- Dedicated team, monthly: from \$8,000 per month per senior engineer, pods of 3 to 8, live in about a week, 3-month minimum; we own delivery.
- Fixed-scope work: AI MVP Sprint \$25,000 to \$40,000 in 6 weeks; AI Integration Pod \$60,000 to \$120,000 in 8 to 12 weeks; Agentic Workflow Build \$150,000 to \$300,000 in 12 to 16 weeks; Embedded AI Pod retainer \$18,000 to \$32,000 per month, 3-month minimum. Minimum engagement \$25,000.
- Invoiced monthly in USD; payment terms and paper per your program MSA. Rate card by role and seniority available on request.

HOW WE DELIVER

- Small senior pods of 2 to 4 engineers own each engagement end to end, up to 8 or more for enterprise. The engineers you meet in scoping are the engineers who build; where a requisition needs a specialist from our contracted bench, the profile says so and you interview them before start.
- Minimum 4 hours of guaranteed daily overlap: roughly 8 am to 12 pm ET, early morning PT, 5 to 8 hours for Australia, near full day for the UAE. We build during your evening; you start the day reviewing finished work and open pull requests.
- Weekly demos, staging deploys every week, documented async handoffs. Engineer replacement within 10 business days with documented handover.

- Thinkscoop is the single contracting party for every engineer we supply.

SECURITY, COMPLIANCE AND LEGAL

- Mutual NDA before the first technical conversation, executed within 24 hours. Client paper accepted.
- 100% IP transfer on every engagement. Code lives in the client's repository from day one. No license lock-in.
- SOC 2 Type I audit in progress; report shared under NDA once complete. We do not claim certifications we have not earned. Systems are designed for SOC 2, ISO 27001, GDPR and sector rules (HIPAA, FCA, PCI-DSS).
- We work inside the client's cloud and security perimeter. PII is detected and redacted before any LLM processing. Client data is never used to train third-party models. Retention agreed per engagement and enforced automatically.
- Security review on every production deployment; OWASP Top 10 and dependency scanning in CI/CD; prompt-injection testing on AI systems; third-party penetration testing supported. Audit rights accommodated by agreement.
- Every engineer, employee or contract specialist, is background-verified (identity, education and employment history) and under NDA before touching client systems. Contract specialists are disclosed where a client program asks.
- Vendor onboarding pack: pre-filled security questionnaire (published at thinkscoopinc.com/trust), architecture diagrams, AI risk register, data-flow documentation. Average onboarding 5 business days.
- Insurance: professional indemnity and cyber cover being bound; carrier, limits and certificate confirmed before contract signature. Tell us your required limits and whether a US-admitted carrier is mandatory.
- Tax and entity: Indian LLP, foreign entity for US purposes; W-8BEN-E supplied on request. Not a US small or diverse business; no NMSDC or WBENC certification.

PROOF (PUBLISHED CASE STUDIES)

Client	Work	Result
EY	AI risk and audit documentation system, 12 weeks, inside EY's Azure environment	72% less report preparation time, 50+ concurrent engagements across 6 countries, zero hallucination incidents
